DAU News

DAU Single Sign-On Update

DAU is in the process of implementing a single sign-on (SSO) capability that will allow users to authenticate once and have access to multiple applications within DAU for which they have privileges. Our goal is to simplify authentication to DAU systems used by the acquisition workforce by providing a "unified identity" that will allow for single sign-on to applications. SSO will include the Virtual Campus (<https://learn.dau.mil>), Acquisition Community Connection (ACC) (<https://acc.dau.mil>), and Defense Acquisition Portal (DAP) (<https://dap.dau.mil>), which includes Ask-A-Professor (AAP), and ACQuipedia. We had previously deployed SSO for the Virtual Campus (<https://learn.dau.mil>), and the launch for the SSO capability on ACC/DAP/AAP/ACQuipedia was implemented the week of 17-21 April. As such, these sites were offline during this deployment window.

IMPORTANT: Once the SSO is fully implemented, all users must have a unique DAU identifier (DAUID#) to access DAU systems. As part of our implementation pre-work, we attempted to reconcile all ACC accounts to a DAUID# and were unsuccessful. Users who received an email on 27-28 March, stating that we were unable to find a DAUID# for them, should contact dauhelp@dau.mil for assistance.

What you can expect from DAU's Identity Management system for the Single Sign-on implementation.

- The first email will provide you with your user name, your DAUID#, and instructions on how to set up your profile in DAU's Identity Management system. (Keep this email for future use).
- The second email will provide you with your temporary password. This is needed to set up your profile in the Identity Management system.
- Subsequent emails will notify you that you have been granted access to a specific application (e.g., Virtual Campus, ACC, DAP).

Once you have set up your profile in the Identity Management system, you will be able to log in via single sign-on to any application that has been deployed with that capability. At login, you will have the option to use your DoD CAC or your SSO username and password. Additional information can be found on the DAU [FAQ site](#).

USD(AT&L) Releases Memo on New DoD Instruction 5000.02

Deputy Secretary of Defense Ashton B. Carter issued interim policy, effective immediately, to replace the previous DoD Instruction 5000.02. This instruction provides the detailed procedures that guide the Operation of the Defense Acquisition System and applies to all organizational entities within the Department. See Under Secretary of Defense (Acquisition Technology and Logistics) Frank Kendall's policy memo to the Defense Acquisition Workforce concerning DoDI 5000.2 implementation.

DoD IPS Implementation Roadmap

The [Integrated Product Support Roadmap](#) has been updated to reflect the interim DoDI 5000.02.

ESOH Community Redesigned

The [Environment, Safety and Occupational Health \(ESOH\) Community](#) has been overhauled, from graphics to content and resources. The new content elaborates on the guidance in the Defense Acquisition Guidebook and contains key resources, such as the "Guide to ESOH in the PESHE, SEP, and NEPA/EO 12114 Compliance Schedule." The content was developed with the help of the DoD Acquisition ESOH Integrated Product Team (IPT) Working Group and contains the information that was deemed most important to include in this improvement effort. In time, additional topics such as battery safety, laser safety, and energy usage/fuel consumption reduction will be added to the site. Please join the [ESOH Community](#) on the ACC, take a look at the content, and share with others.

DAU HOT TOPIC FORUM BOOK LAUNCH ADAPTING TO FLEXIBLE RESPONSE 1960-1968

The Defense Acquisition University is sponsoring and hosting a hot topic training forum/book launch on Wed, 7 May 2014, from 11:30am-1:00pm, in the Hirsch Center on the DAU Capital/NE (Ft Belvoir) Campus. The presenter/author is Dr. Walter S. Poole, who served as Chief of the Histories Branch in the Joint Chiefs of Staff History Office until his retirement in 2000. He is currently writing a history of the Office of the Secretary of Defense during the presidencies of Richard M. Nixon and Gerald R. Ford.

Interested in how the acquisition process transformed to today's process during the historical period of Flexible Response? The presentation will cover the interplay – and friction – of acquisition and military strategy during a period of increased centralization in DoD and the Vietnam War. Come to the forum – sponsored jointly by DAU's Defense Systems Management College (DSMC); the DAU Alumni Association on behalf of DAU; the OSD Historical Office; and the DAU Acquisition Community Connection (ACC) – and find out as Dr. Poole discusses his book, "Adapting to Flexible Response, 1960-1968"; volume II in the series "History of Acquisition in the Department of Defense."

Seating is limited. To reserve a seat at Fort Belvoir for this no-cost learning and development forum, please [register](#) NLT COB Tue, 6 May 2014. Attendance at VTC sites, and any refreshments for VTC attendees, will be handled by coordinators from each of the DAU Regional Campuses. Information regarding VTC locations will be posted on the DAU Alumni Association website as received.

Coming Soon ... Updated MDID

The revised [Milestone Document Identification \(MDID\)](#) tool will be deployed (to the interim DoDI 5000.02) on 24 Apr 2014, on the Defense Acquisition Portal (DAP). The purpose of the MDID is to provide a quick view of Statutory and Regulatory documents required in the DoDI 5000.02: Table 2 Milestone and Phase Information Requirements; Table 5 Recurring Program Reports; Table 6 Exceptions, Waivers, and Alternative Reporting Requirements; and Table 10 Information Requirements Unique to the Urgent Needs Rapid Acquisition Process. The acquisition workforce will be able to filter content based on Program Type, Life Cycle Events, and Source (Statutory/Regulatory), and view

by Milestone and Acquisition Phase. A new print feature has been added to permit users to filter and print/save their outcomes. Eventually the MDID will provide links for cross-referencing both the DAU glossary and the Defense Acquisition Guidebook.

Presentations Posted for January HTF & April Acquisition Training Symposium

The Defense Acquisition University (DAU) hosted a hot topic training forum on 15 Jan and an acquisition training symposium on 8 Apr. Presentations for both have been posted online.

The 15 Jan forum, which supported Better Buying Power 2.0 risk reduction measures, focused on "Information Assurance (IA) for DoD Systems: Transformation from DIACAP to a New Risk Mgmt Framework (RMF)." The presentation covered: Why the transformation from the traditional DoD Information Assurance Certification and Accreditation Process (DIACAP) to a new six-step risk management framework (RMF) for Information Technology?; RMF overview and applicability within DoD; Alignment of DoD with the risk management approach of other Federal Agencies; and Timelines for implementation. View the [presentation](#).

The 8 Apr theme was "Achieving Better Acquisition Outcomes in Austere Times – Improved Processes, Reduced Overhead." The symposium provided an opportunity for both government and industry acquisition professionals to receive training and perspectives on implementing the Better Buying Power (BBP) 2.0 initiatives of the Undersecretary of Defense for Acquisition, Technology and Logistics (USD(AT&L)). Attendees learned about a variety of topics: Driving Unnecessary Costs out of the Services Acquisition Process; Agile Program Management; a DoD 5000 Series Update; The Future of Defense Acquisition; Tacit Learning – Finding Proven Practices and Lessons Learned for Acquisition Managers; Maintaining Readiness While Enabling Cost Reduction Through Infrastructure Sizing and Shaping; and Summary Reports of Winning Papers of the Hirsch Research Paper Competition. In a period of fiscal challenges and technological opportunities, the sessions focused on learning hard skills – training in the latest USD(AT&L) policy, practices, and techniques that attendees could take back to the workplace and apply. View the [presentations](#) and check back later for video links.
